Meeting your business needs

With the Jenson Corporation you can always be assured of three key attributes: An exceptional product; the very highest quality of craftsmanship; superb value for money.

You are in charge. We are here to make the design and manufacture of your clothing and accessories a stress-free experience, allowing you as much, or as little, involvement in the arrangement as you wish.

Whether you want a complete design through-to-distribution service; a simple and reliable source of quality merchandise; or one of the many permutations in between, our team is on hand to guide you every step of the way.

The best fabrics; the best designs; and tailoring the branding possibilities to best suit your business, is what we do.

Bringing your brand to life

As an integral part of your business, and an indicator of where you stand in the industry, your brand deserves the optimum level of visibility.

With bespoke apparel, suited to your business needs, the Jenson Corporation will inject a fresh vibrancy into your corporate and promotional merchandising. We will raise the bar set by your competitors, maximise market awareness of your company and create a striking individuality that really brings your brand to life.

Thinking big

The Jenson Corporation always has an eye on the bigger picture. We are a local company with a global mindset.

We offer a friendly face, a deep understanding of our market and clientele, and a company you can talk to on a personal level. The Jenson Corporation has partners and factories in Europe, the Far East and Asia. We keep costs down without compromising on excellence, possibly one of the most important factors in today's market and one that allows us to compete successfully.

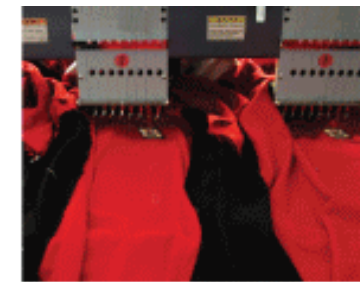

The Jenson Corporation is proud of its success and of the steadfast business relationships that have been forged along the way. It is this that drives us to continuously pursue our commitment to providing the utmost level of service, without ever conceding ground on the three attributes that have brought us this far.
